AI

LLM chatbots NLP
ML pipelines
Face recognition

STRENGTHS

- Fast learner, strong problem solver
- Clear communication with clients
- Reliable delivery on deadlines

PROFILE

Full-stack developer with over six years of experience writing clean, responsive code across Angular, React, Next.js, Node.js, Ionic, PHP and AWS. I own the whole delivery, from interface to API, data model and deployment, and ship products that behave the same on web, Android and iOS. Known for strong communication, effective problem-solving and consistently meeting deadlines with high-quality results.

EXPERIENCE

Full-Stack Developer & AI Specialist

2020 - Present

Freelance, Upwork

- Delivered web and mobile products for clients in Food Tech, Productivity, Recruitment and AI, all shipped on time with 5-star feedback.
- **Pieology Pizzeria:** cross-platform ordering platform with customisable menus, real-time pricing, secure checkout and Google Maps store locator (Angular, Ionic, Node.js).
- **Planiac:** agile planning tool with sprint boards and real-time collaboration for web, Android and iOS (Angular, NestJS, Laravel).
- **City Barbeque:** restaurant website and native apps with online ordering, payments, Google Analytics and WCAG-aligned accessibility.
- **Gradsiren:** job portal for students and graduates with advanced search, application tracking, notifications and cloud deployment.
- **MicoVision:** AI-powered banner creation platform with real-time editing, template library and scalable cloud rendering (React).

Full-Stack Developer

2018 - 2020

Crayon Solution and various clients

- Built and maintained web applications with Angular, React, Ionic, Laravel and PHP for a range of clients.
- **Central Library Management System:** face-recognition and reCAPTCHA-secured login, barcode automation for books and ID cards, role-based dashboards, course management, email reminders and an AI chatbot.
- Gained hands-on experience in hybrid mobile development and cloud integration.

EDUCATION

BCA, Bachelor of Computer Applications

2016 - 2018

Bhagwan Mahavir College of Computer Application, Surat

Pieology Pizzeria

2022 - 2024

Upwork · Angular, Ionic, Node.js · Web, Android, iOS

- Interactive ordering with customisable pizzas and real-time price updates.
- Google Maps store locator and secure multi-option payment gateway with order tracking.
- Lazy loading, caching and optimised API calls for faster loads across all platforms.
- Single Angular/Ionic codebase with full feature parity on web, Android and iOS.

Planiac

2023 - 2024

Upwork · Angular, NestJS, Laravel · Web, Android, iOS

- Sprint boards and planning tools to manage tasks and monitor progress.
- Real-time collaboration with instant updates and notifications.
- Performance tuned for complex workflows and data-intensive operations.
- Positive client feedback for intuitive, agile-focused design.

City Barbeque

2023 - 2024

Upwork · Angular · Web, Android, iOS

- Online food ordering with dynamic menus, cart and secure payment gateways.
- Location search via Google Maps, admin-managed offers and promotions.
- Google Analytics tracking and WCAG-guided accessibility.
- Sustained high traffic during promotional campaigns without performance issues.

Gradsiren

2022 - 2023

Upwork · Angular · Web, Android, iOS

- Job portal connecting students and graduates with internships and entry-level roles.
- Filters by location, industry and job type; candidate and employer profiles.
- Application tracking, real-time notifications and candidate-employer messaging.
- Cloud deployment built to handle high traffic with uninterrupted service.

MicoVision

2023 - 2024

Micowork · React, AI/ML · Cloud

- AI generates professional advertising banners from minimal user input.
- Industry-specific designs, template library and live editing of colours, text and layout.
- Optimised rendering pipeline and scalable cloud storage for assets.

Central Library Management System

2018 - 2019

Crayon Solution · HTML, Node.js, PHP

- Face-recognition login with reCAPTCHA, plus barcode scanning and printing.
- Role-based dashboards for students, faculty, admins and guests; custom ID cards.
- Book issuance and returns, availability lists, demand requests and email reminders.
- Integrated chatbot for real-time assistance.
